Staff Retention and Engagement: Strategies for Success	
Ottategies for Guocess	
MedProGroup	-
Speaker bio	
Joyce Bruce, RN, MSN, JD, CPHRM, Vice President, Risk Solutions, MedPro Group (Joyce.Bruce@medpro.com) Joyce provides comprehensive services to healthcare systems, hospitals, and clinics in the Midwest. She has more than 20 years of experience in the healthcare	
industry working in clinical practice, hospital administration, law, and consulting. Joyce's extensive clinical leadership includes experience as director of nursing in tertiary and pediatric facilities. In these roles, she led the development of quality programs, delivery of care models, and	
clinical care paths, including creation of data collection systems. In addition to her healthcare background and expertise, Joyce's legal experience includes insurance defense, criminal defense, and healthcare law.	
Joyce is a graduate of Indiana University with a bachelor of science degree in nursing and a master of science degree in nursing admisistation. Joyce earmed her juris doctorate from Indiana University—Indianapolis. She is a member of the Indiana Bar, Ohio Bar, American Society for Health Care Risk Management, the American Association of Nurse Attorneys, and the Ohio Society for Health Care Risk Management. She is also a certified professional in healthcare risk management.	
Disclosure	
MedPro Group receives no commercial support from any ineligible company/	
commercial interest. It is the policy of MedPro Group to require that all parties in a position to influence the content of this activity disclose the existence of any relevant financial relationship with any ineligible company/commercial interest.	-
When there are relevant financial relationships mitigation steps are taken. Additionally, the individual(s) will be listed by name, along with the name of the commercial interest with which the person has a relationship and the	
nature of the relationship. Today's faculty, as well as CE planners, content developers, reviewers,	
editors, and Risk Solutions staff at MedPro Group, have reported that they have no relevant financial relationships with any commercial interests.	

iectives

At the conclusion of this program, participants should be able to:

- Discuss the scope of the problem and impact of staff disengagement and retention in healthcare
- · Identify key factors in staff turnover in healthcare
- · Review the business case for addressing staff engagement and
- Consider strategies to improve engagement and retention in your organization or practice
- · Identify measures success for your organization and data elements needed

Disengagement, Burnout and Turnover: The Scope of the Problem

Historically

- Burnout has been a long term problem in healthcare –
- Characterized as a high degree of emotional exhaustion and depersonalization (i.e., cynicism) and a low sense of personal accomplishment at work.
- Workplace phenomenon, not an individual diagnosis
- Requires organizational solutions and responses
- Prior to COVID-19, just over half of healthcare providers reported burnout symptoms
 COVID increased levels of burnout and staff turnover
- Post-COVID higher levels of burn-out continue related to:
- 44% of HCW are somewhat likely or very likely to look for a new job
- Staffing shortages
 Cost-cutting measures
- Delayed healthcare services now causing increase in demand
- DEI issues with younger healthcare workers

The impact on patier	

- · Increased patient safety events
- Higher rates of hospital acquired pressure ulcers
 Increased medication errors
- Increased hospital acquired infections (HAI)
- Decreased patient satisfaction
- · Increased morbidity/mortality
- · Increased hospital re-admissions
- Decreased communication

Potential impact on healthcare workers

Workplace violence

- A factor in burnout, staff dissatisfaction and disengagement
 Violence against healthcare staff is under-reported
 25% of nurses report being physically abused by patients or families
- 50% of nurses report verbal abuse or workplace bullying
- Estimated that WPV is a factor in 17% of nurses leaving their job every year
- Post COVID
- · Harassment reports have doubled
- Decrease in management trust
 Increase in belief there is insufficient staff

The Business Case for Staff Engagement and Retention Initiatives

Organizational impact

- ➤ Financial
- ✓ Reduced bed availability
- $\checkmark \ \text{Reduction in appointments, delays in patient scheduling}$
- ✓ Reduced or eliminated services
- ✓ Delayed implementation of new services or expansion of current services
- ✓ Use of contract/temp staff, recruitment/retention bonuses
- > Decreased staff morale
- > Reputational issues
- ➤ Patient incidents/safety events
- > Patient complaints
- > Inability to recruit and retain staff

The financial impact of turnover by the numbers

- Increased by 6.4% last year and is approx. 22-26% (2022)
- Cost of turnover increased 13.5% last year
 Average cost of turnover of 1 RN averages \$40,200-\$64,500
 Vacancy rates in excess of 10%
- Recruiting time frame averages 3 months
- Each percentage decrease in RN turnover will save a hospital \$380,600
- Eliminating 20 travel RNs can save a hospital an average of \$3,140,000
- Hospital contract labor are an average of 500% more than pre-pandemic levels
- Hospital labor expenses per patient are up over 19% vs. pre-pandemic level
 Average turnover in long-term care averages 29% with licensed staff at 39% and CNAs at over 50%
- Decreased operating margins (down an average of 37% for 2022)

Qualit	V OU	tcomes	impact

- Increase in hospital acquired pressure ulcers (HAPU) (\$94,000-\$222,000) average
- Increased patient falls and patient falls with injury
- Increased mortality
- Increased readmissions
- · Decreased patient satisfaction
- · Long-term care:
- Increase in pressure ulcers
- · Urinary tract infections
- Increased hospitalizations
- Increased mortality
 Increased falls

Business case example 1

- Hospital A has 17 operating rooms, one of which is dedicated for cardiovascular/open heart (OH) $\,$
- There are 27 RN travelers staffing all operating suites, all RN positions (9) in the CV suite are currently staffed with 100% travelers including 2 traveling surgery techs
- RN Cost \$157,000 x 27 = \$4,239,000
- Surgery tech \$50,000 x 2 = \$100,000
- RN turnover (last 12 months) \$40,200 x 22 = \$884,400
- Does not include OR tech turnover costs
- Surgical site infections increased by 14 from prior year (ave. cost \$10,443 to \$25,546) = \$146,202 - \$357,644
- Average increase in the LOS over the last year by 1.1 day
- Volume decrease due to staffing issues

What should be the action plan?

Business case example 2

- A large multi-specialty practice has difficulty staffing one of it's PCP offices with providers APPs and medical assistants. Typically, there is a scribe assigned to one of the PCPs but they must be pulled to staff rooms.
- Lost physician revenue \$990,034
- Recruitment costs \$61,200
- Decreased physician productivity due to loss of scribe
- Vaccine error from new staff member
- Patient complaints from lack of same day appointments and appointment bookings over a month out.

What should be the action plan?

Create a	Culture of	Engagement	(leadershin	in action
Cieale a	Culture or	Elluauellielli	(leauer Silip	III action

- Make engagement a priority including governing boards/partners
- Leadership in action
- Not just walking rounds
- Encourage transparency and negative feedback
- Provide leadership training and support, identify those leaders with individual needs
- Focused surveys to define the extent, sources and conditions impacting engagement
- Communicate, communicate- all levels, across disciplines
- Address outlier providers, leaders, staff

Create a Culture of Engagement

- Prioritize staff and patient safety
- Invest in staff
 Orientation
- Education
- Training/certification
- Design robust communication channels
 Front line
- Staff meetings
- Boards
 E-communications
- · Participation in process changes
- Shared governance/shared decision making
- Team training

Provide positive feedback and recognition
